

争做零跑者 RaceToZero

March 23, 2018

Open Letter by Global CEOs

Urging Businesses to Join Race to Zero and Safeguard Our Environment

We, the undersigned leaders of corporations representing diverse business interests and sectors of the global economy, are united in our commitment to building a cleaner, more prosperous world. We recognize the significant market opportunities that exist in reducing waste and emissions in our business practices. We know that the strongest global firms thrive by investing early in cutting-edge clean technologies and resource efficiencies. We understand that sustainable business practices are particularly crucial in China, where the transition to a low-carbon economy is rapidly underway. And we believe that the private sector must lead efforts to address the economic and environmental risks associated with global climate change. That's why we are supporting the Race to Zero initiative, in pursuit of a zero-emissions, zero-waste economy.

The Race to Zero is a clear statement of our commitment to reduce the environmental impact of our operations. We urge all corporate leaders to join us.

Sincerely,
